

► SANTA FE ULTRA205

The **Ultra205** features patented heat exchanger technology that allows the dehumidifier to remove up to 205 pints of water a day, provide fresh air ventilation, and superior air filtration (MERV-13). Ideal for light commercial applications and large homes with high ceilings.

MODEL 4031560

PERFORMANCE

Water Removal	@ 80°F and 60%RH	@ 73°F and 60%RH
	205 Pints / 25.625 Gallons	171 Pints / 21.375 Gallons
Efficiency	5.7 Pints/kWh	5.19 Pints/kWh
Energy Factor	2.7 L/kWh	2.46 L/kWh
Blower	526 CFM @ 0.0" WG	
	495 CFM @ 0.2" WG	
	458 CFM @ 0.4" WG	
Fan	400 Watts	
Operating Temperature	49°F Min., 95°F Max.	
Sizing	Up to 5,000 Sq. Ft. / 50,000 Cu. Ft.	

ELECTRICAL

Power	1525 watts @ 80°F and 60% RH
Supply Voltage	115 volt – 1 phase – 60 Hz
Current Draw	13.2 amps
Power Cord	9', 115 VAC, Ground
Circuit Requirement	20 Amp dedicated

NEMA 5-20P Plug
14ga10'

SPECIFICATIONS

Duct Connections	6" Round Inlet, 10" Round Inlet, 10" Oval Outlet
Drain Connection	3/4" Threaded Female NPT
Refrigerant	R410A, 2 lbs. 1 oz.
Unit Dimensions	20.25"W x 21.75"H x 41.5"D
Unit Weight	140 lbs.

SHIPPING

Shipping Dimensions	25"W x 28"H x 42"D
Shipping Weight	173 lbs.
Pallet Quantity	1 per pallet
UPC Number	859029004694
Shipping Options	LTL

Specifications are subject to change without notice. Performance is based on pints / gallons per day. Sizing is based on 10 foot ceiling height. Unit dimensions and weight are with collars on.

* Previously the Ultra Aire 205H.

FEATURES

- + High capacity water removal
- + Engineered for low temperature operation providing comfort year round
- + Use of DEH 3000/R digital control for outdoor air ventilation and humidity control
- + Superior MERV-13 filtration to improve indoor air quality
- + Ducting option for fresh outdoor air ventilation
- + Push button reset for transformer protection

Whole House Dehumidification for Comfort, Health and Property Protection

According to experts, controlling humidity inside the home is essential for whole home comfort, reducing health risks, and protecting the structure of the home and its contents. While the air conditioning in your home will remove moisture from the air, it only does so when it is running for a significant amount of time, and never to a set relative humidity. Newer systems offer dehumidification but in reality they are only overcooling to try to remove more moisture.

Indoor humidity levels can rise dramatically when outside temperatures are moderate, and the air conditioner is not running. The Santa Fe Ultra Series Whole House Ventilating Dehumidifiers are the solution to healthy, comfortable living.

Comfort

Addressing comfort in the home is very important to your family's quality of life. High humidity can cause us to feel either hot and sticky or cold and clammy, while also contributing to musty odors in the home.

Health

According to the *Environmental Protection Agency*, health problems associated with poor indoor air quality include eye irritation, allergies, headaches and respiratory problems such as asthma. The chart below shows that 50 percent is the optimum relative humidity level during the humid times of the year when it comes to protecting your health.

Property Protection

Maintaining humidity levels below 60 percent is one of the most important steps in protecting a home and its contents. Excess moisture in the home can cause musty odors and be detrimental to wood floors, furniture, artwork, electronics, and even the home's overall structure.

The Solution

The Santa Fe Ultra Series Whole House Ventilating Dehumidifiers provide dedicated dehumidification, optional mechanical outdoor air ventilation, and superior MERV 13 filtration to create an indoor environment that is healthy, comfortable, and protected. Manufactured in Madison, WI, these commercial-grade units are energy-efficient and backed by an industry-leading 6-year warranty.
